

About MB WAY

Due to the rapid rise of mobile commerce in Portugal, Multibanco has introduced MB WAY. MB WAY is a wallet payment method that is already used by over 4 million consumers.

How does it work?

When choosing MB WAY as a payment method during checkout, your customer will be redirected to the MB WAY payment page. After this step, the customer will have to select a preferred bank where he will be asked to provide a mobile telephone number. Your customer will then receive a payment request via mobile phone. Once clicking on this notification, the MB WAY app will be opened. The payment card is selected in the app and the transaction is checked. Your customer then confirms the transaction by approving the payment with the PIN code of the used payment card. Once the transaction is successful, your customer will receive a confirmation.

Benefits of MB WAY via Buckaroo

- Instant online acceptance
- The most used payment method in Portugal
- MB WAY and Multibanco can be requested separately or combined
- Pay safely and securely with MB WAY
- Contract and payment via Buckaroo

Availability MB WAY

MB WAY is available via the Buckaroo API and the Buckaroo checkout.

Mobile payment process MB WAY for users

The payer chooses MB WAY as the preferred online payment method

The payer is asked to provide a personal mobile phone number and to click on 'Pay'

The payer receives a payment request on the mobile phone and opens the request in the MB WAY app

In the app, the payer approves the payment with the Multibanco PIN or via biometric data (Face ID or Touch ID)

The transaction is confirmed and the payer is redirected to the webshop
