

Tip: Can be combined with Buckaroo PayperEmail

Introduction

Apple Pay is Apple's mobile (Wallet) payment method. Consumers can pay online in 3 ways: besides the widely used checkout, payments can also be made directly from the shopping cart and directly from the product page. In the Apple Wallet app, the user can link one or more debit/credit cards. The payment is ultimately processed with one of the linked cards. Apple Pay is seen as the payment method offering the greatest ease of use. Payments are confirmed simply using Apple's TouchID or FaceID.
