

**What is Knaken Settle?**

In the Netherlands, 10% of the population is active in the crypto market. An increasing number of consumers are trading in cryptocurrencies, leading to a growing demand for conducting online purchases with cryptos. The collaboration between Buckaroo and Knaken responds to this trend by allowing active Knaken users to pay with cryptos in webshops. Thanks to the platform 'Settle', developed by Knaken, consumers can settle their crypto balance. As a payment provider, Buckaroo facilitates the secure and swift processing of Knaken transactions in the checkout.

**How does it work?**

When paying via Knaken, the Settle platform verifies whether the payer's cryptocurrency balance is sufficient to cover the required amount in euros. If so, the payer is given the option to approve the transaction, including the conversion rate. As a webshop, you bear no cryptocurrency risk. You offer a product or service in euros and Buckaroo will payout the full approved purchase amount in euros. With Settle, Knaken users can settle payments with more than 150 different types of cryptocurrencies such as Bitcoin, Ethereum, USDC, and Cardano. Payments via Settle are immediate and guaranteed.

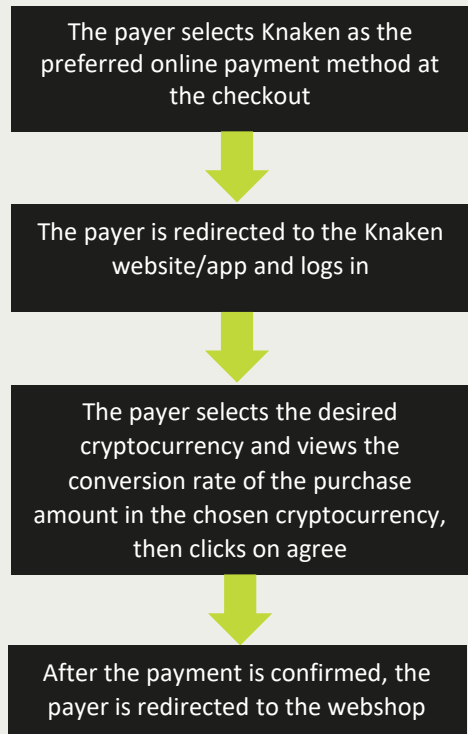

**Advantages of Knaken via Buckaroo**

- Direct online acceptance
- With Knaken, payments can be made in 150+ cryptocurrencies
- A payer can settle directly from their Knaken cryptocurrency balance
- Buckaroo pays out the full purchase amount in euros
- Guaranteed payout
- Secure and swift checkout with Knaken-Settle
